

Resin Bond Diamond (R Series)

Using RVD diamond as raw materials ; appearing sharp-edged of cutting blade when being crashed under certain pressure, have a good self sharpness performance; Irregular particle surface and shape-edged of corner cut.

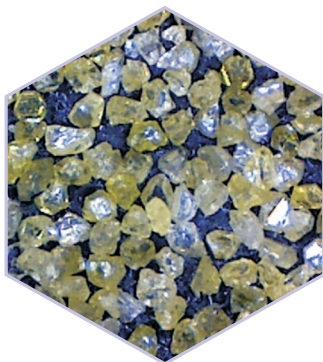

Applications: Applied to processing tungsten carbide, PCD die, stone materials, ceramics, gems and optical glass, PCD workpiece, etc.

CHANGSHA 3 BETTER ULTRA-HARD
MATERIALS CO.,LTD

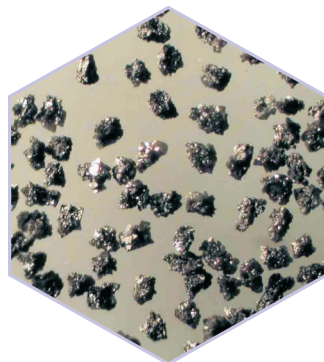

RVD (Yellow/ Green)

Resin bond diamond , irregular crystal shape , preferably self sharpness . Can be used in making resin bond or vitrified bond grinding apparatus to processing hard alloy , non-metal and polishing natural diamond , etc.

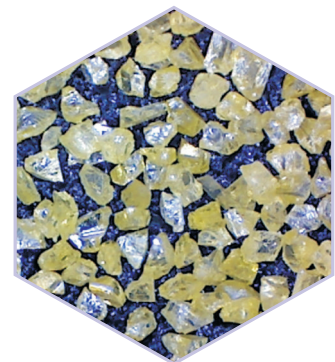

RVG (PolycrystallineDiamond)

Multi-nano-crystal structure , black , low intensity , micro-chipping and good self sharpness . Applied to resin bond tools required high processing efficiency.

High Grade Diamond

Made from high grade diamond grits.

Grade	Grit												
	50 /60	60 /70	70 /80	80 /100	100 /120	120 /140	140 /170	170 /200	200 /230	230 /270	270 /325	325 /400	400 /500
