

# X Diamond Powder

Most of the diamond micron powder was made from Water-washing methods, crashed and filter from the diamond grits; Our X-Micron powder was directly made from the press-machine. So it has the character of complete cube crystal shape, highest anti-impact strength, higher purity, can be widely in higher grade diamond wire saw.

Application: it would be widely used for metal bond tools and diamond tools industry.

## “SUN BETTER” Product advantage

» VS Item:  
**hardness**
